Our communities

Cyber Women Community is an active community of ladies connecting experts in Cybersecurity with women who want to develop their competences in this field. The community aims are to share knowledge, promote and support women in discovering their professional path in the field of cybersecurity and in new technologies through meetings, webinars and mentoring.

HR Data Club is a community of HR professionals for whom the analyst plays a key role in HR and in the company's strategy. The task of the HR Data Club is to integrate the environment, build a platform for the exchange of knowledge and experience as well as networking among HR professionals. HR Data Club carries out its activities through scheduled cyclical meetings promoting the integration of the environment.

The task of the CSO Council is to integrate the community, build a platform for the exchange of knowledge and experience, and networking among the heads of Information Security and Cybersecurity in companies and institutions operating in Poland. The CSO Council will carry out its activities through scheduled regular meetings and other forms promoting the integration of the community.
